Overview

The ForeSite Case Management System is a Salesforce SaaS application developed to support ISN's Background Investigation (BI) programs. It features a range of modules and tools designed to enhance the efficiency of background investigation and screening processes.

This document serves as a user guide, concentrating exclusively on the modules created for DIA users.

ForeSite Modules Overview

The ForeSite Case Management application comprises 15 modules:

- **Dashboards**
- Announcements
- Case Management
- Lead Management
- **Ingestion Wiz**
- Timesheets
- Onboarding
- CDRL Reporting
- Invoicing Gizmo
- **Manifest**
- PM Reports
- App Management
- System Administration
- **Customer Interface**
- My Resources

Access to these modules is determined by user roles. DIA users are granted access to all the modules highlighted in yellow in the list above.

User Roles and Access Levels

The ForeSite CMS supports the following user roles:

- PMO User
- CMO User
- Investigator
- QA
- **Customer User**
- Security
- Document Specialists
- Payroll
- Contracts
- Security (FSO)

Dashboard Module

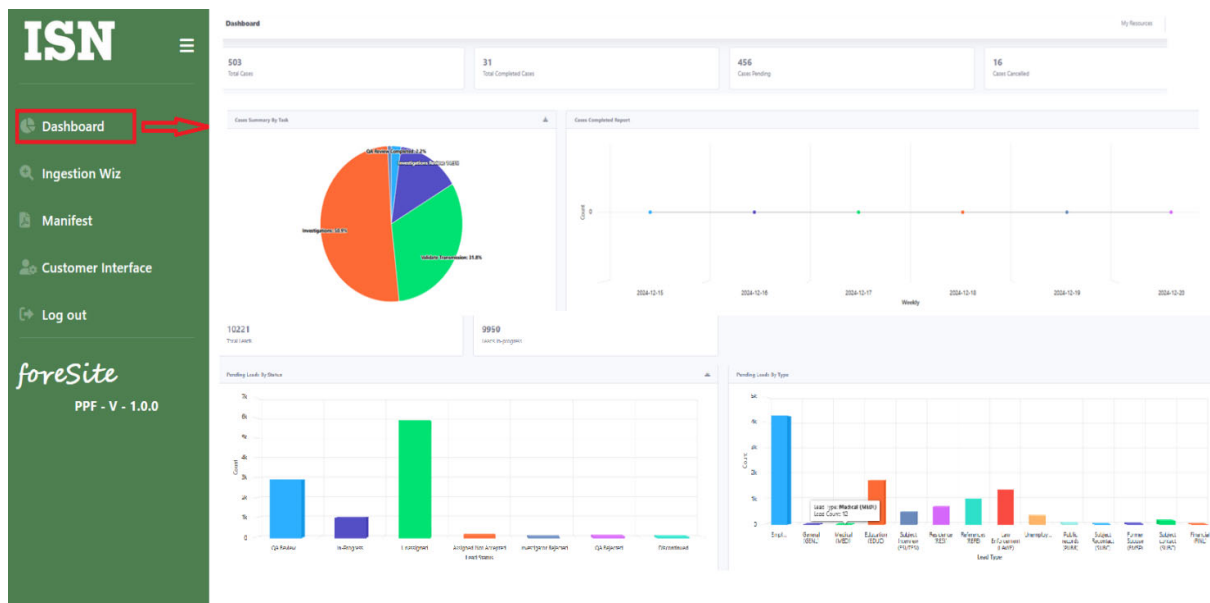

The Dashboard module serves as the landing page upon logging into the ForeSite portal. It offers key metrics and insights for all DIA cases ordered by DIA, providing users with a clear and comprehensive overview.

This module is designed to facilitate efficient tracking and management of case statuses, ensuring streamlined oversight of ongoing processes.

Key Features

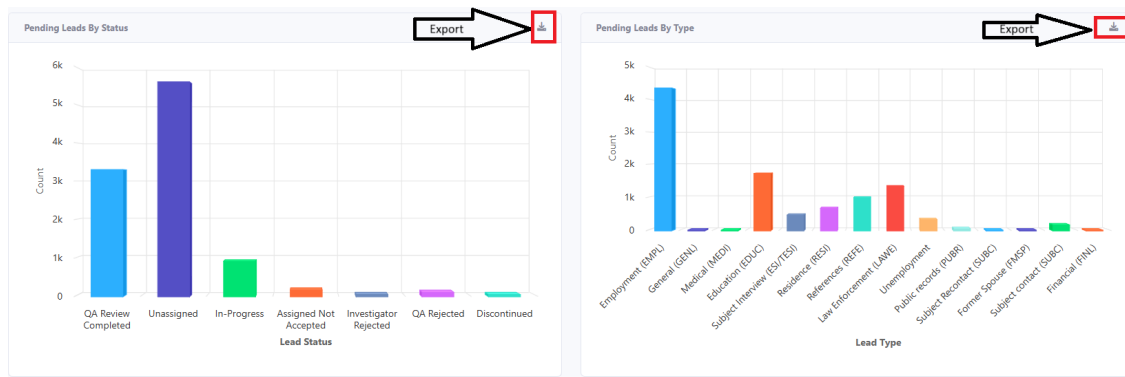

- **Summary Metrics:** Displays the total number of cases ordered, cases completed, cases pending, and cases canceled.
- **Pending Cases Breakdown:** Offers a detailed summary of pending cases by task status, such as the number of cases transmitted, under investigation, or in the QA review queue.
- **Task and Lead Details:** Highlights the number of items or tasks pending, categorized by both status and lead type.

- **Data Export:** Allows users to extract underlying case and lead data in CSV format for further analysis.

Export

The data underlying each dashboard chart can be exported in CSV format by clicking the download arrow located at the top-right corner of the chart.

Ingestion Wiz

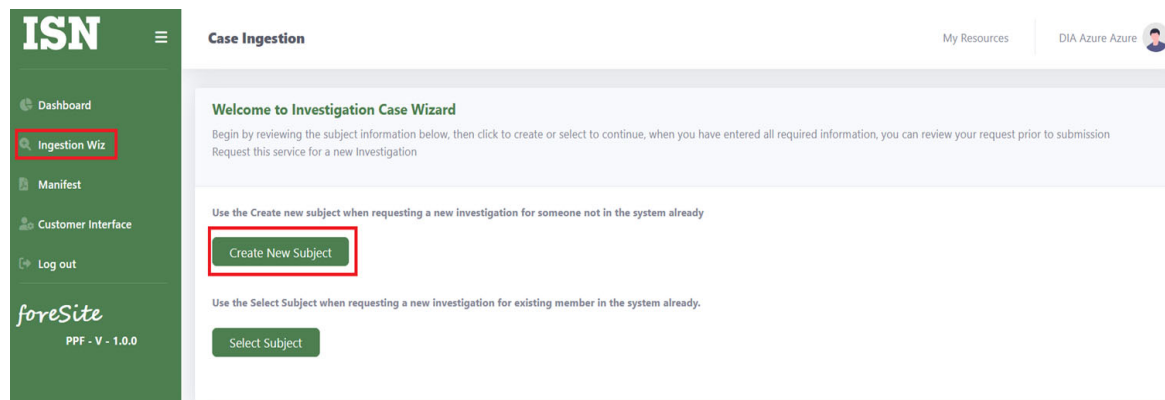

The Ingestion Wizard streamlines the process of case creation in the ForeSite Case Management System, specifically designed to onboard new cases and subjects seamlessly into the platform.

Key Features:

- **New Case Onboarding:** Enables users to initiate new cases with minimal subject information, offering flexibility and ease of use.
- **Investigation Initiation:** Facilitates the start of new investigations for subjects already onboarded in the system.

How to Onboard a Case Using the Ingestion Wizard:

1. Navigate to the left menu and select Ingestion Wiz by clicking on the option labeled 'Ingestion Wiz'.

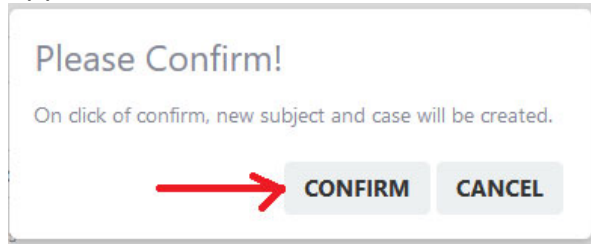

2. Fill out all required fields marked with red asterisks (*).
3. Once all mandatory information is entered, click the **Create** button to initiate the onboarding process.

The screenshot shows the ISN Case Ingestion Wizard form. The form is titled 'Welcome to Investigation Case Wizard' and contains a 'Create New Subject' button. The form fields are grouped into two columns. The first column contains 'First Name*', 'SSN*', 'Phone*', 'City*', and 'Zip*'. The second column contains 'Last Name*', 'Email*', 'Street Address*', and 'State*'. All fields are marked with a red asterisk (*). A red box highlights the entire form area. A red arrow points to the 'Create' button at the bottom. A red star icon and the text 'Mandatory/Required' are shown to the right of the form.

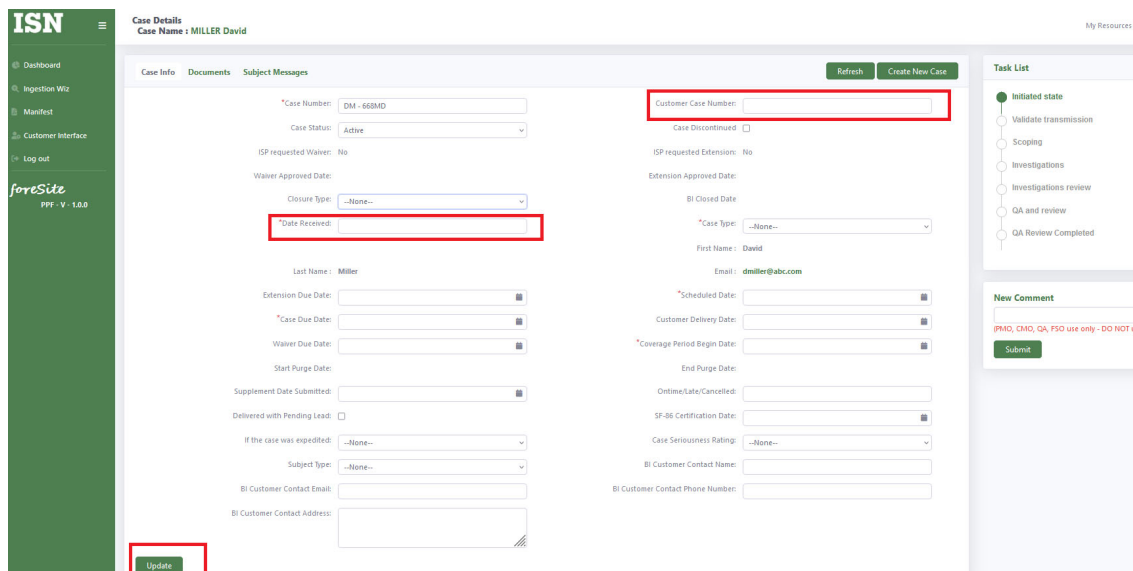

Field	Value
First Name*	David
Last Name*	Miller
SSN*	111-22-2666
Email*	dmiller@abc.com
Phone*	(213) 909-0668
Street Address*	10411 Motor City Dr
City*	Bethesda
State*	MD
Zip*	20874

Create

- When the 'Create' button is clicked, a confirmation dialog box will appear.

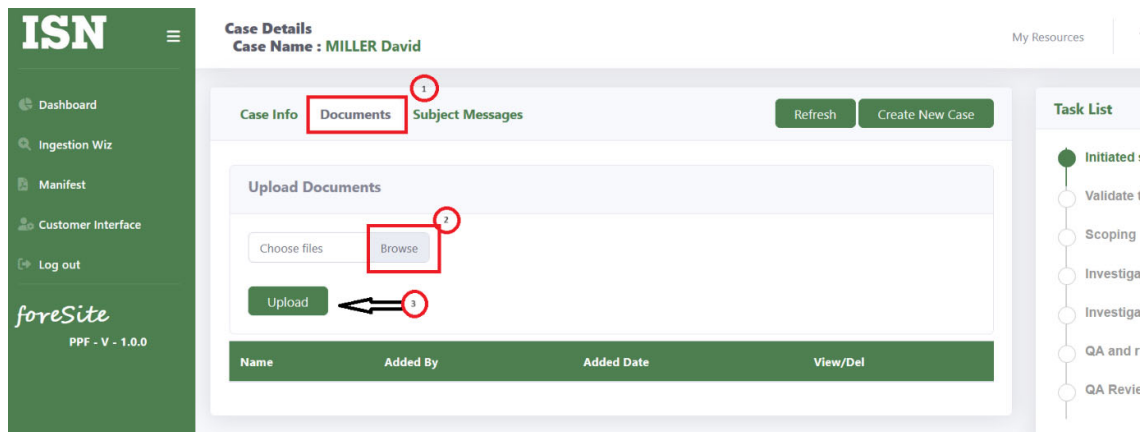

- Upon clicking the 'Confirm' button in the confirmation dialog, the system will navigate to the 'Case Info' tab.
- On the 'Case Info' tab, enter the DIA case number and the order date, then click the 'Update' button.

The screenshot displays the 'Case Details' page for 'Case Name: MILLER David'. The page is divided into several sections:

- Case Info:** Contains fields for Case Number (DM - 608MD), Case Status (Active), Closure Type (None), Date Received (highlighted with a red box), and various dates (Extension Due Date, Case Due Date, Waiver Due Date, Start Purge Date, Supplement Date Submitted).
- Customer Case Number:** A field highlighted with a red box.
- Update:** A button highlighted with a red box at the bottom left.
- Task List:** A vertical list of tasks including 'Initiated state', 'Validate transmission', 'Scoping', 'Investigations', 'Investigations review', 'QA and review', and 'QA Review Completed'.

- The final step in the case onboarding process is to upload the case paperwork via the 'Document' tab.

Customer Interface

The Customer Interface is designed to streamline order management and delivery management for customers.

Key Features

- Order Placement:**
 Customers can place bulk orders by uploading order files in CSV format. Unlike the Ingestion Wiz module, which supports onboarding one case at a time, the order placement feature allows for **bulk ordering**.
- Deliverables Access:**
 Customers can download completed case reports, including ROIs with findings from background checks, directly from the ForeSite Customer Interface.
- Secure Access:**
 Customer users are granted secure, controlled, and conditional access to CMS cases and deliverables. This module is designed to provide a seamless and secure experience for customers, enabling efficient order management and easy access to deliverables.

How to process bulk orders:

Customers may prefer to place orders in bulk, eliminating the need for manual document uploads and individual field updates.

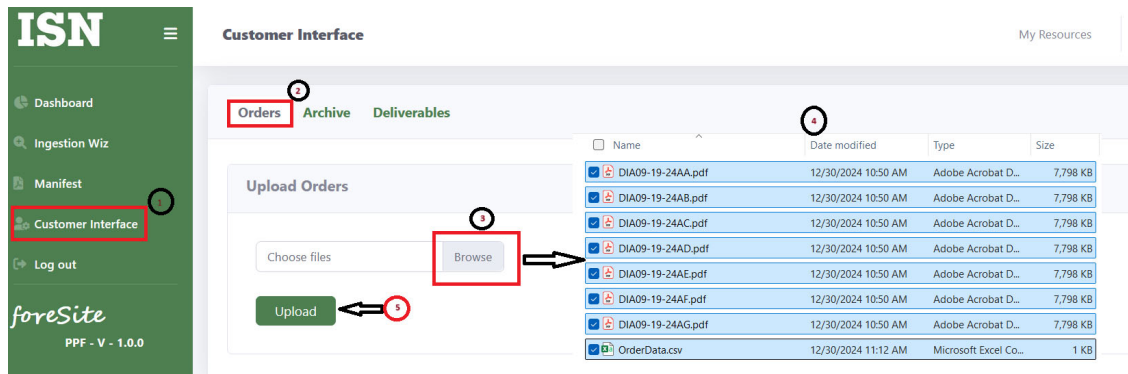

Preparing your upload is crucial for processing bulk orders. Ensure that the upload dataset meets the following requirements to complete bulk orders successfully.

1. The CSV file should always be named OrderData.csv
2. The CSV file header column names must match the following format:

First_Name__c	Last_Name__c	SSN__c	Email__c	Phone__c	Address__c	City__c	State__c	Zip__c	Document Name
Brian	Goodson	070-80-2234	ckgoodson3@gmjil.bad	(606) 266-6776	101 Sample Lane	Peoria	AZ	85382	DIA09-19-24AA.pdf
Kace	Chaney	090-38-0773	stqcey.chqney.mft@gmjil.bad	(766) 206-3540	102 Sample Lane	Crownsville	MD	21032	DIA09-19-24AB.pdf
Lindahl	Regan	309-49-4703	ronjjindqhl@gmjil.bad	(540) 370-9945	103 Sample Lane	Stephens City	VA	22655	DIA09-19-24AC.pdf

3. The "Document Name" must always have a .pdf extension.
4. The email address must be valid.
5. Data in any of the columns should not contain comma separators

Once you have prepared your upload, navigate to the 'Customer Interface' module and follow the steps outlined in the screenshot below to upload the order. *Ensure that all files are selected together before clicking the 'Upload' button.*

Validate

After completing the bulk upload, it is essential to verify that all cases and documents have been properly uploaded into ForeSite. To do this, navigate to the 'Archive' tab in the Customer Interface and click the 'Refresh' button. Expand the order to review the cases uploaded into ForeSite. The 'Status' column will indicate whether the upload was successful. Any status other than 'Success' signifies that the upload encountered issues. To investigate further, click the 'Log' button to download the log file for detailed insights. Once the issues are resolved, you can re-upload the order.

The screenshot shows the ForeSite Customer Interface. On the left is a green sidebar with the ISN logo and a menu including Dashboard, Ingestion Wiz, Manifest, Customer Interface (highlighted with a red box and number 1), and Log out. The main area is titled 'Customer Interface' and has tabs for Orders, Archive (highlighted with a red box and number 2), and Deliverables. A 'Refresh' button (highlighted with a red box and number 3) is in the top right. Below the tabs is a table with columns: OrderNumber, Created Date, Created By, Status, View, and Log. The first row (highlighted with a red box and number 4) shows OrderNumber DIAOrder-000135, Created Date 12/30/2024, Created By Umesh Kunvar, Status Success, View, and Log.

Deliverables

The 'Deliverables' feature in the Customer Interface module enables you to review and download results once the background investigation is completed. You can search for a case deliverable using the first name, last name, or social security number. To view or download a deliverable, click the 'View' icon located on the far right of the screen.

The screenshot below provides navigation steps to view and access case deliverables for completed cases.

Manifest Module

The Manifest module in ForeSite allows you to generate weekly manifest reports as well as custom manifest reports for any specified period. The reports are formatted to comply with DIA requirements for manifest generation.

To generate a custom manifest report, navigate to the 'Manifest' module from the left-hand navigation menu and click on 'Generate Custom Manifest'.
